

## Ductwork & Sound Walls

Engineered ventilation and sound control delivering safety, acoustic integrity, and precision where it matters most

Industry: Automotive  
Location: Fort Wayne, Indiana  
Construction: Brown Field  
Project Size: \$1.1 M

## DVT Alignment Intergration

Demo and installation of a new DVT booth and alignment machine, including modifications to supply and exhaust ductwork and pit supply duct to declassify the pits as confined spaces. In lieu of a full booth, HMW fabricated and installed custom sound walls around the machines to provide hearing protection.

### Scope of Work

Custom duct modifications and acoustic barriers engineered to support final-line vehicle testing and operator safety

- ✓ Demo Booths
- ✓ Supply / Exhaust Rework
- ✓ Sound Barrier Walls

### Project Accomplishments

H.M. White enhanced operator safety and reduced noise exposure by engineering ventilation upgrades and custom sound walls for new DVT stations.

- ✓ Logistical Challenges
- ✓ Several Project Phases
- ✓ Non-production Install

### Partners

Thanks to our project partners for their expertise, collaboration, and commitment to excellence

- ✓ CCC
- ✓ Ductworth & Associates
- ✓ HMW Fab and Install trades

H.M. White excels in delivering successful sheet metal projects across automotive, industrial, commercial, specialty, and energy-saving sectors
