

# H.M. WHITE

## Water Test Booth

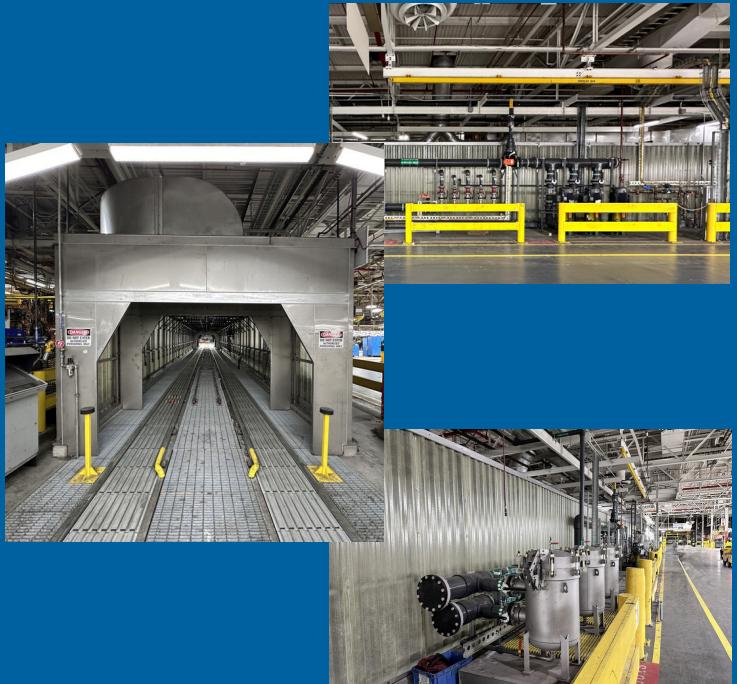

HM White has decades of experience designing, engineering, and fabricating custom water test booths for the automotive industry.

**Industry:** Automotive

**Location:** Claycomo, MO

**Construction:** Retrofit

**Project Size:** 120'x15' Spray Booth

## Ford FCAP Water Test Booth

HM White delivered the turnkey design, fabrication, installation, and commissioning of a truck water test booth with an integrated blowoff system. The scope included the design of the spray booth enclosure, water distribution, spray piping, and exit blowoff system. HMW self-performed fabrication and equipment installation and partnered with union piping and electrical contractors, as well as a controls partner for electrical system design and commissioning.

### Scope of Work

Engineering, Fabrication, and Installation of a Water Test Booth & Soak Booth and corresponding Ventilation

- ✓ Corrosion resistant
- ✓ Optimised spray coverage
- ✓ High-volume blow-off system

### Project Accomplishments

Delivered a water test booth project that is corrosion resistant, optimizes spray coverage, and ahead of schedule while ensuring safety and quality.

- ✓ 500+ safe man hours
- ✓ Completed ahead of schedule
- ✓ Exceeded expectations

### Partners

Thank you to our valued partners and our in-house fabrication and installation crews!

- ✓ Genesys System Integrators
- ✓ MMC Piping Contractors
- ✓ Electrical Company of America
- ✓ CEC Controls

H.M. White excels in delivering successful sheet metal projects across automotive, industrial, commercial, specialty, and energy-saving markets. Call us today to experience superior quality products and industry-leading innovation!
